

CPM FLEXIEE 7.0

- ▶ FLEXIEE 7.0 is an ankle rehabilitation device with Dual-Axis Motion technology. It supports Flexion/Extension, Inversion/ Eversion, and Rotation exercises, offering convenient and safe use with a one-touch lever and stop button.
- ▶ New technologies for medical devices lead you to a new life.
- ▶ This product is a rehabilitation exercise device for the recovery of ankle joint functions.

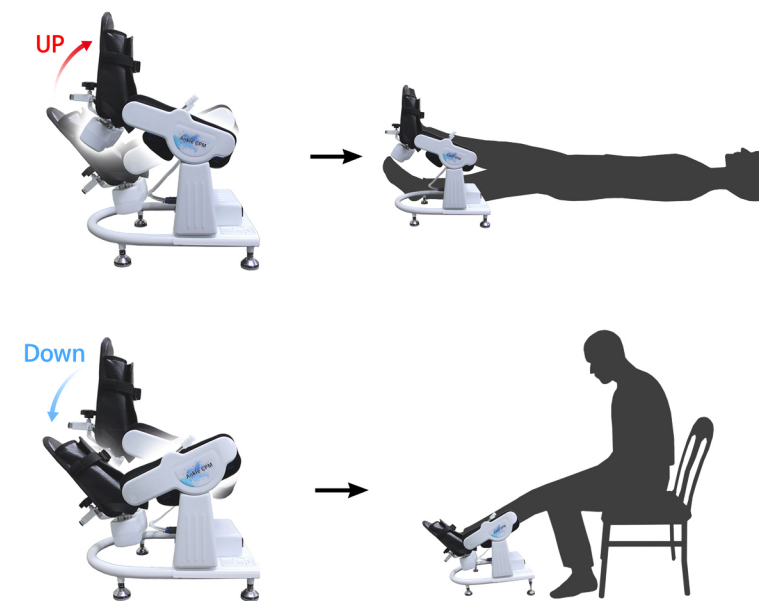

Precision Motion. Confident Recovery

Benefits & Features

- **Dual Motion Capability:** Supports both Plantar/Dorsi Flexion ($60^{\circ} \sim 0^{\circ} \sim 40^{\circ}$) and Inversion/ Eversion ($40^{\circ} \sim 0^{\circ} \sim 40^{\circ}$), performed independently or simultaneously.
- **Patient Comfort:** Adjustable design allows comfortable use in both sitting and lying positions.
- **Ease of Use:** Simple setup with a handy controller enables quick adjustment of exercise range, angle, and duration.
- **Portability & Flexibility:** Lightweight structure (approx. 11 kg) makes it easy to move and install in various clinical settings.
- **Safety & Reliability:** Dual safety mechanisms, emergency stop function, and compliance with international medical standards ensure safe operation.

Posture control lever

- User can adjust the device posture with a one-touch level.

Two exercise

- User can do two exercise at the same time.

Technical Specifications

Range of Motion	Dorsi/Plantar Flexion : $60^{\circ} \sim 0^{\circ} \sim 40^{\circ}$ Inversion/Eversion : $40^{\circ} \sim 0^{\circ} \sim 40^{\circ}$
Exercise Mode	Normal/Vibration Progress/Limited Pause
Speed	5 Steps
Timer	0~60 (min)
Weight	11 (kg)
Dimension	51 X 40 X 50 (cm)
Rated Voltage	220 (VAC)
Rated Frequency	60 (Hz)
Power Consumption	70 (VA)
Electric Safety Class	Class 1, Type B
