

CPM FLEXIEE 8.0

- ▶ FLEXIEE 8.0 is a combined medical device featuring a motorized system for ankle muscle reconstruction and joint recovery, along with a compression sleeve to promote blood circulation.
- ▶ It allows patients to perform rehabilitation exercises while sitting or lying down, with adjustable angles, simple settings, and an emergency stop button for safety.

**Gentle, Safe Rehabilitation
for Bedridden and Elderly Patients**

Features

- Ankle Joint Range of Motion: Plantar/Dorsi flexion from 30° to 130°, with 5 adjustable speed levels.
- Equipped with Multiple Exercise Modes

- Calf Air Cuff Pressure
-Adjustable in 5 levels to suit patient needs.

- Emergency Stop Button
-Ensures safe and quick shutdown.

- Plantar Stimulation Rod
-Designed to ease foot discomfort caused by plantar fasciitis.

- Adjustable Angle Design : Supports exercises in both lying and seated positions

Technical Specifications

Range of Motion	Plantar/Dorsi flexion : 30° ~ 130°
Exercise Mode	M1 : Progressive Mode
	M2 : Limited Pause Mode
	M3 : Limited Pause + Calf Pressure
	M4 : Calf Pressure
	M5 : Pla/Dor + Plantar Pressure
Speed	5 Steps
Air Pressure Level	5 Steps
Timer	0~60 (min)
Weight	8.2 (kg)
Dimension	33.4 X 44.6 X 42 (cm)
Rated Voltage	100~240 (VAC)
Rated Frequency	50/60 (Hz)
Power Consumption	70 (VA)
Electric Safety Class	Class 1, Type B
